-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 16, 2004 has been entered.

Claim Objections

Claim 3 is objected to because of the following informalities: In line 2 of claim 3, the word "dihydrogen" is misspelled. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-9, 11, and 13-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaminsky et al. (US 6,080,905).

The Kaminsky reference discloses a process for the purification of olefins by contacting an olefinic feed with an adsorbent, which is the same as the claimed adsorbent, to remove

Art Unit: 1764

acetylenes from the feed. The spent adsorbent is then regenerated by contacting it with a hydrogen gas stream to remove acetylenes from the adsorbent. The hydrogen gas stream may be pure hydrogen, which would necessarily contain less than 0.5 ppm carbon monoxide. The adsorption step is operated at conditions that are the same as the claimed operated conditions. Specifically, Kaminsky discloses adsorption temperatures ranging from -20° to 200°F (-7° to 93°C). See col. 5, line 37 through col. 10, line 3; col. 11, line 35 through col. 12, line 12; and col. 16, lines 54-56.

Response to Arguments

The argument that one of ordinary skill in the art would not be deterred from using a carbon monoxide-containing reducing gas for regeneration is not persuasive because Kaminsky discloses that pure hydrogen can be used. A reference is not limited solely to its preferred embodiments.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Walter D. Griffin whose telephone number is (571) 272-1447. The examiner can normally be reached on Monday-Friday 6:30 to 4:00 with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
